1. Project Laboratory

The components and facilities available in the project laboratory empower students to undertake real-time projects and explore emerging technologies. The lab is designed not only to support high achievers aspiring to participate in prestigious competitions such as Ideathon, Proof of Concept(POC),Hackathon,Smart India Hackathon (SIH) and Codeathon but also to encourage and motivate the slow learners by providing them with exposure, guidance, and opportunities to build confidence through practical engagement. Thus, this laboratory acts as a comprehensive platform for all the students, fostering creativity, collaboration, and excellence in project-based learning.

The institution provides well-equipped laboratories that enable students to carry out their project work effectively. All laboratories are supported with high-speed internet connectivity (80 Mbps) and computer systems installed with advanced software tools, ensuring that students can access to the necessary resources for their academic and research projects.

The Components in this project laboratory (as listed below) provide a wide range of opportunities for the students to undertake real time projects in various domains according to their individual interests.

2. Centre of Excellence in Data Science

NVIDIA virtual GPU technology empowers virtual workspaces by enhancing their power and performance. This technology enables students to conveniently access the applications directly from the data centre. By creating secure and immersive learning environments, students can now access these virtual workspaces from any device, irrespective of their location. This flexibility makes students to conveniently engage in their work, irrespective of the location.
