

**Department of Electronics &
Communication Engineering
in
Association with
IETE**

**ORGANIZES A FIVE DAYS FDP
(HYBRID MODE)
ON**

**ADVANCEMENT IN ANTENNA DESIGN
AND OPTIMIZATION USING RIS,
METASURFACES FOR DEFENCE AND
STEALTH APPLICATIONS**

07.09.2026 TO 11.09.2026

**FN Session :10:00 AM- 12:00 PM
AN Session :02:00 PM-04:00 PM**

ABOUT THE COLLEGE

Kongu Engineering College (KEC) is one of the premier autonomous institutions committed to providing value-based technical education and fostering innovation in engineering and technology. The institution emphasizes academic excellence, research, and industry collaboration to shape globally competent professionals.

ABOUT THE DEPARTMENT

The Electronics and Communication Engineering department occupies a prominent place in the annals of its academic history. The specialization of the faculty includes Telecommunication System Engineering, Computer Networks, Power Electronics, Control Systems, VLSI, Bio-Medical Engineering, Digital Signal Processing, Microwave Systems, Automation, Instrumentation and Control etc. The department has excellent laboratory facilities in the areas like Networking, Microprocessors, Electronics, Communication, VLSI, Digital Signal Processing, Microwave, RF, Multimedia, Fiber Optic Communication, Computer Hardware and Maintenance and Computer Centres with latest software. The department offers four-year UG programme in ECE and two-year PG programme in VLSI Design.

ABOUT THE FDP

The Five-day Faculty Development Programme on "Advancement in Antenna Design and Optimization Using RIS, Metasurfaces for Defence and Stealth Applications" aims to showcase the rapid evolution of wireless communication, radar, and electronic warfare systems, which has increased the demand for intelligent, adaptive, and stealth-enabled antenna technologies. Emerging concepts such as Reconfigurable Intelligent Surfaces (RIS) and metasurfaces are revolutionizing antenna design by enabling dynamic beam steering, radar cross-section (RCS) reduction, and spectrum efficiency. This FDP aims to provide participants with both theoretical foundations and practical exposure to advanced antenna technologies, computational electromagnetic tools, and their applications in defence, aerospace, and next-generation wireless systems. Eminent resource persons from reputed academic institutions, research organizations, and industry will share their expertise, offering participants valuable insights into current research trends, real-world design challenges, and emerging opportunities in this domain.

WHO CAN ATTEND

**Faculty, Research Scholars, and
PG Students**

SESSION BREAKDOWN

- Next-Generation Defence Antennas: From Design to Deployment
- Arrays to intelligence surfaces
- Stealth Antenna Technologies for Modern Defence Platforms
- Frequency Selective surfaces and its defence applications
- Radar Cross Section Reduction Using Metasurfaces and Metamaterials
- Metamaterial inspired antennas
- EBG, AMC structures
- Machine Learning Techniques for Antenna Performance Prediction

HONORABLE SPEAKERS

Dr. Lingasamy Veluchamy
Manager, Research and Development
Rakuten Mobile Inc, Bangalore.

Dr. Ramprabhu Sivasamy
Assistant Professor
Madras Institute of Technology,
Anna University, Chennai.

Dr. Kasturi Sudam Patil
Ansys-ARK technologies, Chennai

Dr. Selvakumarasamy
Professor, SIMATS ENGINEERING,
Chennai, India.

Dr. J. Vijayalakshmi
Associate Professor
Kongu Engineering College.

Dr. R. Ramyea
Assistant Professor (SL.G)
Kongu Engineering College

Dr. S. Arulmurugan
Assistant Professor
Kongu Engineering College

REGISTRATION DETAILS

Fees: Rs. 400/- including GST (Non IETE Members)

Fees: Rs. 300/- including GST (IETE Members)
