

WORKSHOP

ON

QUANTUM MACHINE LEARNING

(QML)

Bridging AI & Quantum Computing
for Future Innovation

WHY ATTEND THIS WORKSHOP?

- ✓ Learn future-ready technology
- ✓ Combine AI + Quantum Computing
- ✓ Enhance research & teaching skills
- ✓ Boost career & industry opportunities

08/08/2026

CSD CC6

CONDUCTED BY

- Dr.R.Thangarajan
- Dr.E.Gothai
- Dr.P.A.Selvaraj

DURATION

1 Day

MODE

Offline

Certificates

Will be Provided

REGISTRATION FEE

Rs.885

Including GST

ABOUT THE PROGRAM

This WORKSHOP explores the fundamentals of Quantum Machine Learning (QML) and its real-world applications. Participants will learn quantum algorithms, implement models using Qiskit and PennyLane, and work on hands-on projects.

WHO SHOULD ATTEND?

- Students interested in AI & Quantum Computing
- Faculty Members & Research Scholars
- Data Analysts & ML Enthusiasts
- Professionals looking to switch to Quantum Computing

PREREQUISITE

No prior experience required.

TRAINING HIGHLIGHTS

- ✓ Live Instructor-Led Sessions
- ✓ Hands-on Practical Learning
- ✓ Real-time Project Development
- ✓ Notes & Source Code will be Provided
- ✓ Lunch and refreshment will be provided

HIGHLIGHTS

- 01 Classical Computing
- 02 Quantum Mechanics
- 03 Mathematical Foundations
- 04 Quantum Computing Fundamentals
- 05 Basic Quantum Algorithms
- 06 Quantum Processing Units and SDKs
- 07 Quantum Software
- 08 Variational Quantum Algorithms (VQAs)
- 09 Applying VQAs in Quantum Machine Learning
