Topics to be Covered

- Hazards Management
- From Hazard to Safety: Building a Strong Process Safety Culture
- Industry Safety and Emergency Management
- Quantifying the Unthinkable: Risk Analytics for Safer Process Industries
- Safety by Design: Inherently Safer Process Systems
- Smart Monitoring for Safer Plants: Advanced Process Safety Technologies
- Fire, Explosion & Toxic Release: Controlling High-Consequence Hazards
- Process Safety Management and Accident Prevention Strategies in Industries
- Process Safety – Why, What, How?
- Towards Zero Incidents: Emerging Technologies for the Next Generation of Safe Industries

For Registration

Participants can sign up and register for the programme using the link given below:

Register Now

https://forms.gle/uSfXCdAiWfEAvGxa6

Participants Limited to 50

Who Can Attend

- PG Students
- Research Scholars
- Faculty Members (Assistant / Associate)
- Industrial Representatives

can attend the FDP and get exposed to the latest technologies in process safety and risk analytics.

Organizing Committee

Co-ordinator :**Mr. J. Sridhar,**
Professor of Practice (PoP)

Co-coordinators :**Dr. D. Nesakumar,**
Assistant Professor (SLG)

:**Ms. K. Kalaivani,**
Assistant Professor (SRG)

FIELD VISIT

Adani Cements, Madukkarai, Coimbatore

Supporting the UN Sustainable Development Goals

Important Dates

Last date for receiving application (online) : **22.10.2026**

Intimation of selection : **23.10.2026**

Confirmation by participants : **24.10.2026**

Registration Fees

Internal Participants : **Free**

External Participants :**Rs. 500/- * + 18 % GST**

**Registration amount does not include food, accommodation or travel expenses for the industrial visit.*

- Accommodation, **per person Rs. 375/- + 18% GST per day.**
- Accommodation includes stay **(Double / Triple share basis), breakfast, lunch and dinner.**
- Accommodation can be provided based on first-come, first-serve basis.

KONGU ENGINEERING COLLEGE
TRANSFORM YOURSELF

DCW LIMITED

Department of Chemical Engineering
Kongu Engineering College, Perundurai, Erode
&
DCW Ltd., Tuticorin
jointly organize
6 Days Hybrid Mode
Faculty Development Programme (FDP)
on

"Process Safety, Risk Analytics and Emerging Technologies for Safer Industrial Systems"

Hybrid Mode **Industry Experts** **Field Visit**

26th to 31st October 2026

Venue

Simulation Lab,
Department of Chemical Engineering,
Kongu Engineering College,
Perundurai, Erode – 638 060

About KEC

Kongu Engineering College (KEC) was established in the year 1984, approved by AICTE, New Delhi and affiliated to Anna University, Chennai. The institution has been accorded autonomous status from the year 2007 and has completed 42 years of dedicated and excellent service in the field of technical education. It offers 15 UG programmes, 6 PG programmes and 20 research programmes in engineering and applied sciences, and is one among the best self-financing engineering colleges imparting high-quality technical education in India. The college is well known for its technical excellence, modern facilities, and record of performance with excellent results and enterprising students. It has NBA accreditation for all UG programmes, the Best Engineering College award, the Best Principal award and ISO certification. The institution has an active Industry– Institute Partnership Cell (IIPC) to interact with industries, and has established a Technology Business Incubator (TBI) on its campus, supported by the Department of Science and Technology, Government of India. The college is honoured with NAAC A++ grade.

About the Department

Department of Chemical Engineering was started in the academic year 1994–1995 and offers B.Tech. programmes in Chemical Engineering with Honours and Ph.D. The department is a recognized centre for carrying out research and comprises qualified staff members with good academic and industrial exposure. Well-equipped laboratories and an excellent study environment cater to the interests of aspiring students. The department focuses on imparting excellent technical knowledge for industry as well as research, and thrust is also being given to research and consultancy services.

About the Programme

“Process Safety, Risk Analytics and Emerging Technologies for Safer Industrial Systems” is designed to provide comprehensive insights into modern process safety principles, industrial risk assessment, and advanced technologies for accident prevention. The programme covers key areas such as hazard identification, risk assessment methodologies, Hazard and Operability Study (HAZOP), Layer of Protection Analysis (LOPA), Quantitative Risk Assessment (QRA), process control and safety instrumentation, and industrial accident investigation. It also emphasizes predictive analytics and emerging tools for real-time risk monitoring and process safety management. Sessions delivered by industry experts and academicians, along with practical demonstrations and industrial exposure, offer valuable insights into real-world safety challenges. This FDP aims to enhance participants’ technical knowledge, strengthen risk-based decision-making, promote technological innovation, and foster academia–industry collaboration towards safer, more reliable, and sustainable industrial systems.

Resource Persons

Mr. P. Manoharan,
Retired Corporate Safety,
Chemplast Sanmar, Mettur

Mr. Gopinath,
Safety Head,Chemfab Alkalis Limited,
Kalapet, Puducherry

Mr. S. Vinoth,
GM–Environmental, DCW, Tuticorin

Mr. T. Palanisamy,
Safety Officer, Sakthi Sugars,
Aapakoodal, Erode

Mr. Ravi Ramasamy,
Adjunct Faculty,Department of Chemical Engineering,
Kongu Engineering College, Perundurai

Mr. J. Sridhar,
Professor of Practice (PoP), Department of Chemical Engineering, Kongu Engineering College, Perundurai

Mr. Lakshmi Narayanan,
Senior General Manager,
Steadfast Safety Solutions, Coimbatore

Mr. M. Elangovan,
Independent HAZOP Chairman, Process Safety / Loss Prevention Professional, Consultant – Safety

Dr.K. Raghu Raja Pandian
Associate Professor, Chemical Engineering
NIT Warangal
