Hands-on Training Workshop

From LLMs to Autonomous Agents: Agentic AI That Thinks, Plans and Acts

Highlights

- Traditional AI vs Generative AI vs Agentic AI
- Large Language Models (LLMs)
- Transformers and Attention Mechanism
- AI Agent Frameworks
- Single and Multi-Agent Architectures
- Agent Communication and Coordination
- Collaborative and Competitive Agents
- Autonomous and Distributed Decision Making
- Conflict Resolution Strategies
- Case Studies in Multi-Agent Applications

Date
31.10.2026
(Saturday)

**Certificates
for All**

Registration Fee

₹354 (Incl. of 18% GST)

Objectives

- Understand Agentic AI systems that can plan, reason and execute multi-step tasks.
- Learn how agents integrate external tools and APIs.
- Explore prompting methodologies.
- Understand building blocks for AI agents.
- Study agent communication, coordination and conflict recovery strategies.
- Explore AI agent frameworks and practical use cases.

Outcomes

- Build hands-on skills in developing AI agents.
- Design agent workflows using modern frameworks.
- Implement single and multi-agent architectures.
- Apply LLMs with tools and APIs.
- Solve real-world problems with autonomous agents.
- Enhance research and innovation capabilities.

Target Audience

Faculty members, Research scholars and UG & PG Students from academic institutions.

Organized by

Department of Computer Science and Design & Industry Institute Partnership Cell
Kongu Engineering College
Perundurai – 638 060, Erode
Tamilnadu

Convenor

Dr. E. Gothai
Professor and Head

Dr. S. Anitha
Associate Professor

Tel: 04294-226565

Website: www.kongu.ac.in

Student Coordinators

- Harish V - +91 93639 20806
- Harshith Kumar B S - +91 98427 07095
